Autism's

comorbidity

Direct Neighbours:

- seizures 30% ~ 7%
- schizophrenia 35% ~ 9%
- bipolar 27% ~ 8%
- depression 20% ~ 4%
- hypotension ??
- alcohol intoxication ? 27%
- intellectual disability 35 ~ 70%

Criticism:

→ alcohol is a coping mechanism & comorbid to depression

→ why no ADAD ???

50 ~ 70%
